<ABOUT ME>

I am a Frontend oriented Software Developer with React, I am looking for my first opportunity in the sector. I love to write clean, reusable and above all readable code, by nature I love to improve existing things, add features to them and improve their build. I am driven by curiosity, I never give up in difficult times and I always focus on pushing my limits. I am a sociable and charismatic person, that's why I like to work in a team. My goal is to give my best and be able to share experiences with a work team.

<PROJECTS>

- CINEFLIX
- 2022 I developed a SPA that consumes a movies API, using the tools that React provides me, it has a section with Premieres, a Favorites section and a Search Section.
- React, Node, Git, Rest Api, Jsx, Bootstrap.
- PORTAFOLIO
- 2022 I developed my personal portfolio which I am currently improving to migrate it to React, using the tools provided by Html and Css I designed a home section, an about section, skills, portfolio and contact.
- HTML5, CSS3, Javascript.

<WORK EXPERIENCE OUTSIDE THE FIELD>

- BIOMASCOTAS
- 2017 - **Administrative**
2022 General administration tasks. Accounting assistance to the area. Bank procedures. ATM.
